

## African Liberation

Conflict is an increasing threat to national and international security and a major challenge to development. It is significant to acknowledge that civil conflict has impoverished countries in every major region of the world, with specific emphasis on Africa. Civil Conflict has wiped out the achievements of decades of economic and social development. In case of Liberia which is the main objective of this study, the 25 years civil conflict not only wiped out the achievements of decades of economic and social development, but destroyed thousands of lives, the physical assets of the country, and disrupted trade links which devastated the fabrics of the Liberian society. The Liberian violent conflict leaves a legacy of militarized, guerilla warfare leadership culture, divided societies, widespread displacement, and decimated institutional capacity. For many Liberians, dealing with devastation of war is a bitter experience that will never be forgotten. The present Liberian political context is extremely imperative in any transition from post-conflict situation to a more stable and secured environment that will facilitate the national reconciliation of former political adversaries and combatants, and lead to a more stable and secured environment that will enable refugees to return to their homes areas and permit the commencement of urgent rehabilitation effort such as the rebuilding of the administrative infrastructure of the country, such as the core ministries, legal system, especially the courts, and the opening and operation of ports, air ports, harbors, telecommunication facilities, and electricity. For these urgent post-conflict rehabilitation actions to take place however, it was necessary for an elected government to be in place with the clear mandate to govern especially where as in Liberia, the conflict originated from a struggle for political power between contending ethnic groups and their armed

supporters. This scenario has not been a reality for the Liberian people. The greatest challenge to the Liberian people, however, is the post-civil conflict reconstruction, rehabilitation, and recovery, indeed for countries emerging from prolonged violent conflict. This study will be focusing on new systems which will require the United States, the International Community, The European Union, The EEC, and other Non-Governmental Organizations, social, political, and economic cohesion as a pre-condition for reconstruction, rehabilitation, reconciliation, and recovery. As a practitioner, specialist, and a 21st century student of politics of life, Post-independence Black-Africa political and historic, cultural and Liberian political scientist, international political systems, comparative international political problems and global political cultural diversity, I am cognizant, and I do indeed care about Liberia /Africa in global conflicts that have profound effects on Africa, and implications which lead to war, instability, and international tension as well as about events which lead to equitable interdependence, integration, peace, improvement of quality of life, reduction of exploitation, imperialism human rights violation perpetrated by post-independence African leadership. Because I am a Black-African-Liberian, I do care about these national, international, regional, state of affairs that specifically affect Africa in general and Liberia in particular, I have tried over the years to make some life time attempt to make some scholastic decisions as it reflects on my research, to advance procedures in conflict management and resolution theories about systematizing my observations and improving my knowledge and skills of pre-conflict analysis of Africa in general and post-conflict analysis of Liberia in particular.
