

Libya at a Crossroads: A Faltering Transition

The Arab Spring uprising in the Middle East and North Africa of 2011 brought with them a period of brief hope for the future of democracy in the region. Millions across many nations demanded changes to the way their countries were being run and in many cases run by dictators who held a stranglehold on power for decades, unrelenting and unyielding. In some countries, the people managed to usher out the ruling party and for a moment, it appeared as though we were ready to see democracy rule the day. However, the lack of infrastructure, the lack of democratic institutions in these countries, as well the lack of political will have all but dashed those hopes and Libya, unfortunately, is one of the prime examples of this. Once Gaddafi was removed from power, those seeking to reform the government quickly proved that they were not up to the task and the country fell into a further state of disunity as armed militias battled for supremacy and control over Libya's future.
